

GUIDELINES ON IMPLEMENTING FDA CIRCULAR NO. 2014-011 ON ADOPTION OF UNIQUE GLOBAL PRODUCT IDENTIFICATION NUMBER FOR DRUG PRODUCTS

Read online (full-text search, related cases, audio case brief): <https://batas.org/library/59e6e59673c4/>

Adopted: 24 June 2015

Date Filed: 23 September 2015

The following guidelines are hereby provided for compliance to FDA Circular No. 2014-011, “Adoption of Unique Global Product Identification Number” of applicants and holders of marketing authorization of drug products:

- All drug product applicants and holders shall have the following:

a)

unique establishment identification number, and

b)

a unique global product identification number.

1.1

Both a) and b) shall be obtained by joining a global standards organization.

1.2

When a local drug establishment joins a global standards organization, a unique establishment identification number is assigned to it and is provided with a series of unique global product identification numbers that can be used to identify their products.

1.3

Imported products may have a unique global product identification number obtained by the overseas manufacturer after joining a global standards organization in another country or region of origin. In this case, the local distributor-importer shall only apply for a unique establishment identification number since the unique global product identification number accompanying the imported product is already acceptable.

1.4

The unique global product identification number shall be as per stock keeping units (SKUs).

- by 31 December 2015, both a) and b) shall be required to be indicated in the integrated application form or other systems of application in the future. No application shall be accepted by FDA without the said numbers.

- Both numbers shall be stored in the FDA database together with the pertinent information about the establishment and products and shall be shared with the relevant government agencies.

- By 30 June 2016, the unique global product identification number in barcode or QR Code shall be required to be

reflected on the labeling materials of the product. Both (1) the batch and, if applicable the lot number, and (2) expiry date shall be part of the barcode.

Consistent with Good Distribution Practices (GDPs) that are implemented by FDA to all drug establishments. The unique establishment identification number and the unique global product identification number shall be used in ensuring the integrity of the drug supply chain, both domestically and globally.

For information and strict compliance.

ABOUT BATAS.ORG

Study smarter at BATAS.org

The Philippine bar review and law-school companion built around how your brain actually remembers.

The complete Philippine law library - free for everyone.

More than 100,000 Supreme Court decisions, Republic Acts, and executive issuances - full-text searchable, browsable by category and year, and always free. No paywall, no login. This PDF came from it.

Audio case-brief lectures.

Any decision becomes a podcast-style lecture - facts, issues, ruling, and doctrine - with read-along highlighting and a hands-free presentation mode. Study while commuting, working out, or resting your eyes.

Bar review built on the science of memory.

Complete, sequenced courses for all eight bar subjects, narrated like podcasts and reinforced with retrieval practice and spaced review - the study techniques with the strongest evidence behind them.

The full law-school curriculum.

One subscription unlocks the entire J.D. curriculum - every subject, every lesson, with your progress tracked down to the paragraph so you can pick up exactly where you left off, on any device.

Mock exams that tell you where you stand.

Timed multiple-choice exams graded instantly, with per-subject score breakdowns and focus suggestions that point you at your weakest topics first.

A study planner that keeps you on pace.

Set your schedule and BATAS tells you every day whether you are on track for bar day - and exactly which lesson to take next.
