

GUIDELINE ON PROBIOTICS

BFAD CIRCULAR NO. 16, S. 2004, October 26, 2004

Read online (full-text search, related cases, audio case brief): <https://batas.org/library/be3459575545/>

The Bureau of Food and Drugs would like to inform the public, clients and the BFAD personnel regarding the guideline on PROBIOTICS. A Probiotic, as defined by Gaerner and Scharfema in 1998, is "a dietary supplement based on living microorganisms which when administered in sufficient quantity, has a beneficial effect on the host organism, improving the equilibrium of the intestinal microflora". We would like to cite that the following are approved bacterial strains used as probiotics

1. Lactobacilli
2. Bifidobacteria
3. Nonpathogenic strains of Streptococcus
4. Saccharomyces boulardi
5. Bacillus causii

The use of bacterial strains not found in the above list shall be subject to (1) demonstration of evidence of safe use as food supplement and (2) analysis of the bacterial species found in formulation. Likewise, BFAD shall use as reference: WHO-FAO "Guidelines for the Evaluation of Probiotics in Food" (2002).

A. The BFAD also would like to inform everyone concerned that, for a Probiotic to be effective, the following properties should be demonstrated:

- a. beneficial effect on the host organism
- b. should be able to survive in the digestive tract
- c. should adhere to the mucosal epithelial cells
- d. should exhibit enhancement and protection of the intestinal ecology.
- e. should remain viable during periods of storage and use.

B. For the demonstration of the safety of a Probiotic, the following documents should be submitted

- a. Determination of antibiotic resistance patterns
- b. Assessment of certain metabolic activities (e.g., D-lactate production, bile salt deconjugation)
- c. Assessment of side-effects during human studies
- d. Epidemiological surveillance of adverse incidents in consumers (post-market)
- e. If the strain under evaluation belongs to a species that is a known mammalian toxin producer, it must be tested for toxin production. One possible scheme for testing toxin production has been recommended by the EU Scientific Committee on Animal Nutrition (SCAN, 2000)
- f. If the strain under evaluation belongs to a species with known hemolytic potential, determination of hemolytic activity is required.

BFAD recognizes and approves the following Probiotic claims as food supplements:

- enhancement of intestinal ecology
- helping improve lactose malabsorption
- improving digestion
- aid to the enhancement of natural resistance to intestinal infections

Such claims may be reflected on the labels and can be used for advertisement and product promotion.

When a Probiotic makes a claim of altering disease or as an immunomodulator, the said product shall be classified as drug. Such above-cited claims denote therapeutic advantage which only a drug product can make. The therapeutic claim should be based on sound scientific evidence based on studies on human subjects.

Adopted: 26 Oct. 2004

(SGD) PROF. LETICIA BARBARA B. GUTIERREZ, MS
Director

ABOUT BATAS.ORG

Study smarter at BATAS.org

The Philippine bar review and law-school companion built around how your brain actually remembers.

The complete Philippine law library - free for everyone.

More than 100,000 Supreme Court decisions, Republic Acts, and executive issuances - full-text searchable, browsable by category and year, and always free. No paywall, no login. This PDF came from it.

Audio case-brief lectures.

Any decision becomes a podcast-style lecture - facts, issues, ruling, and doctrine - with read-along highlighting and a hands-free presentation mode. Study while commuting, working out, or resting your eyes.

Bar review built on the science of memory.

Complete, sequenced courses for all eight bar subjects, narrated like podcasts and reinforced with retrieval practice and spaced review - the study techniques with the strongest evidence behind them.

The full law-school curriculum.

One subscription unlocks the entire J.D. curriculum - every subject, every lesson, with your progress tracked down to the paragraph so you can pick up exactly where you left off, on any device.

Mock exams that tell you where you stand.

Timed multiple-choice exams graded instantly, with per-subject score breakdowns and focus suggestions that point you at your weakest topics first.

A study planner that keeps you on pace.

Set your schedule and BATAS tells you every day whether you are on track for bar day - and exactly which lesson to take next.
